

Saul González

Software Engineer

xsauldev@gmail.com | Mexico City | xsaul.github.io/Portfolio

SUMMARY

Software Engineer with hands-on experience in both full-stack development (React, Node.js, Express) and multi-platform quality assurance (QA), a role I currently hold at Keywords Studios. This combination gives me insight into how software is built as well as how it behaves under testing, bringing a more complete technical perspective to bug detection and communication with development teams. Self-taught, with strong research and problem-solving skills, and a genuine interest in Artificial Intelligence and new technology tools.

EXPERIENCE

Video Game & Software Tester | Keywords Studios, Mexico City

January 2026 - Present

- Lead multi-platform technical testing cycles (Xbox, PlayStation, PC, iOS/Android), applying engineering criteria to identify hardware-specific bugs across architectures.
- Manage the full defect lifecycle in Jira: technical bug reproduction, step documentation, and regression testing validation, working directly with development and design teams.
- Run stress and performance tests (FPS, load times) to validate application stability under different conditions.
- Audit asset integration (graphics, audio) and UI/UX behavior across multiple resolutions and peripherals.

Software Engineering Intern | Itransition, Remote

May 2025 - July 2025

- Delivered full-stack web development projects, building dynamic, responsive user interfaces with React, Tailwind CSS, and Redux.
- Developed RESTful APIs on the backend with Node.js and Express, and managed data persistence with MySQL and Sequelize ORM integration.
- Significantly improved my problem-solving skills by tackling technical challenges across the full stack and discovering effective methods for building and organizing code.
- Met all project deadlines and consistently delivered reliable, implementation-ready features.

Software Quality Analyst | Lionbridge Games, Mexico City

May 2024 - May 2025

- Evaluated UI, UX, and accessibility (Lighthouse, NVDA) for websites across multiple clients, verifying functionality on different devices and platforms.
- Applied my prior frontend development experience to improve bug identification accuracy, documenting findings in Jira in coordination with developers and product managers.

Frontend Developer | ACRI S.C, Mexico City

September 2023 - May 2024

- Developed new web applications to effectively replace the company's legacy Excel macros, resulting in greater control over employee workflows.
- Handled full frontend development with React, Tailwind CSS, and Redux, modernizing legacy processes with functional web tools.
- Gained experience in Figma designing application layouts, applying UI/UX principles to ensure a user-friendly experience.

SKILLS

HTML5, CSS3, JavaScript, TypeScript, React, Node.js, Express, TailwindCSS, Git, SQL, Python
Jira, Postman, Selenium, Playwright, TestRail, Figma, Agile/Scrum, AI Tools (Claude, ChatGPT)

EDUCATION

Telecommunications and Electronics Engineering — Bachelor's Degree (incomplete)
Instituto Politécnico Nacional (ESIME) | July 2018 - December 2021

CERTIFICATIONS

English Certificate — EF Education First (EF SET, C1 level)
Software Engineering Practicum Certificate — Itransition, July 2025

LANGUAGES

Spanish — Native | English — Advanced | Portuguese — Intermediate
