

Saul González

Software Engineer

xsauldev@gmail.com | Mexico City | xsaul.github.io/Portfolio

SUMMARY

Software Engineer with hands-on experience in full-stack development (React, Node.js, Express) and cross-functional QA, a role I currently hold at Keywords Studios. Self-taught, with strong problem-solving skills.

EXPERIENCE

Video Game & Software Tester | Keywords Studios, Mexico City

January 2026 - Present

- Perform manual functionality testing on multiplatform video games (Xbox, PlayStation, PC, iOS/Android), verifying controls, gameplay, characters and scenarios.
- Manage the full defect lifecycle in Jira: technical reproduction, documentation of steps and validation in regression testing, working directly with development and design teams.
- Run stress and performance tests (FPS, load times) and audit asset integration and UI/UX behavior across multiple resolutions and peripherals.

Freelance Web Developer | Lemus & Son (photography studio website)

August 2026 – September 2026

- Designed and built a photography studio website from scratch with React, Vite, React Router and Tailwind CSS: home page, photo grid gallery and service packages page.
- Implemented responsive design with a mobile navigation menu and structured the content and packages according to client requirements.
- Deployed the site to production on Vercel with a custom domain (lemusandson.com) configured via Cloudflare.

Software Engineering Intern | Itransition, Remote

May 2025 - July 2025

- Worked on full-stack web development projects, building dynamic, responsive user interfaces with React, Tailwind CSS and Redux.
- Developed RESTful APIs on the backend with Node.js and Express, and managed data persistence with MySQL and Sequelize ORM integration.

Quality Assurance Analyst | Lionbridge Games, Mexico City

May 2024 - May 2025

- Evaluated UI, UX and accessibility (Lighthouse, NVDA) of websites for multiple clients, verifying functionality across devices and platforms.
- Applied my prior frontend development experience to improve bug identification accuracy, documenting findings in Jira in coordination with developers and product managers.

Frontend Developer | ACRI S.C, Mexico City

September 2023 - May 2024

- Developed new web applications to effectively replace the company's legacy Excel macros, achieving better control over employee workflows.
- Handled full frontend development with React, Tailwind CSS and Redux, modernizing legacy processes with functional web tools.
- Gained experience in Figma designing the application's layouts, applying UI/UX principles to ensure a user-friendly experience.

PERSONAL PROJECTS

- Web app for learning languages with a visual method (in development): architecture with Next.js, Supabase, Zustand and Tailwind CSS; database design and TTS-generated audio bank.

SKILLS

HTML5, CSS3, JavaScript, TypeScript, React, Node.js, Express, TailwindCSS, Git, SQL, Python

Jira, Postman, Selenium, Playwright, TestRail, Figma, Agile/Scrum, AI tools (Claude, ChatGPT)
